

Apex University of Technology: Information Security Risk Treatment Plan

Risk ID	Action Plan	Person Responsible	Target Deadline	Auditor Verification Method
RSK-01 (Academic/Moodle)	The IT department must deploy a system-wide update that locks all device screens after 10 minutes of no use. They must also switch on a mandatory rule requiring all teachers to use a secondary security code on their devices to log into Moodle.	Head of IT	30 days	Ask the IT team to generate a system report confirming that 100% of staff accounts have the 10-minute lock and security device codes turned on.
RSK-02 (Financial/Billing)	Change the billing system rules so that any updates to outgoing student invoices or university banking profiles cannot be saved by a single employee. The system must require a separate staff member to review and approve the change.	Chief Financial Officer CFO	14 days	Inspect the recent system logs to confirm that all changes to banking profiles were approved by two separate employee accounts.
RSK-03 (HR)	Roll out a simple, 15-minute online safety training video on fake emails to all HR staff. Set up an automated email filter that highlights any incoming messages from outside the university with a clear warning notice.	Director of Human Resources	45 days	Review the training dashboard to confirm all HR staff finished the video, and check a test external email to make sure the warning notice shows up,
